Attention: Mr. J. P. O'Reilly, Director

Dear Sir:

SUBJECT: Grand Gulf Nuclear Station
 File 0260/0493/15521/15526
 Final Report For Reportable
 Deficiency As Defined in
 10CFR50.55(e) Number 78/01
 AECM-78/50

Mississippi Power & Light Company contacted Mr. A. R. Herdt and Mr. J. J. Blake of your office on February 6, 1978 of a Potential Reportable Deficiency at the Grand Gulf Nuclear Station construction site. This deficiency concerned an incomplete film package received from a valve supplier. On June 21, 1978, we filed an interim report which stated reportability would be determined by July 28, 1978. We have since determined that this matter is reportable within the meaning of 10CFR50.55(e). Details of these findings including corrective commitments are described in the attached final report of this matter.

Yours truly,

J. P. McGaughy, Jr.
 Director of Power Production
