1050 17th Street
Denver, Colorado 80265

Gentlemen:

This is in response to your letter of June 6, 1979, requesting copies of two documents referred to in Conditions No. 12 and 13 of your recently renewed license. As discussed during our August 8, 1979, meeting, we do not have extra copies of these documents; however, they are available for copying in the NRC Public Document Room, located at 1717 H Street, Washington, DC.

Information on these documents is as follows:

1. The November 18, 1974 document is entitled "Safety Analysis Report," and was prepared by Dames & Moore for Atlas Minerals. It was submitted in support of your request for license renewal.
2. The April 20, 1978, document is a letter from Jeff Atwood to L. C. Rouse providing information on yellowcake area air cleaning devices.

For your information, we are enclosing minutes for our meeting of August 8, 1979. Should you have any questions about this transmittal, please contact Mr. P. Garcia (301-427-4103) of my staff.

Sincerely,

John J. Linehan, Section Leader
Operating Facilities Section
Uranium Recovery Licensing Branch
Division of Waste Management
