Docket No. 50-289

George F. Lear, Chief, Operating Reactors Branch #3, RL

THREE MILE ISLAND, UNIT 1: ADMINISTRATIVE SECTION OF TECHNICAL SPECIFICATIONS

In response to your informal request we have reviewed the proposed update of the review and audit section (Section 6.5) of the subject Technical Specifications dated December 23, 1974. We find that this section is unnecessarily cumbersome and does not, in several aspects, satisfactorily conform to Section 6.5 of the Standard Technical Specifications or Section 4 of ANSI N18.7. We recommend that a meeting be held with the applicant to discuss this section of his Technical Specifications.
