Mr. Clan D. Parr, Chief
Light Water Reactors - Branch 3
Division of Project Management
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Subject: LaSalle County Station Units 1 & 2
Mark II Containment
NRC Docket Nos. 50-373/374

Reference (a): L. O. DelGeorge letter to O. D. Parr
dated March 23, 1979

Dear Mr. Parr:

Commonwealth Edison provided information described in Reference (a) to revise the Design Assessment Report for LaSalle County Station. Subsequently, additional information was developed in response to NRC discussions; that information has been incorporated into the updated Appendix C which is attached.

This information reflects the current status of the Mark II Owner's Group on this subject. In our judgement, this submittal resolves all outstanding Mark II Containment issues because we feel that these criteria agree with those of the Commission.

Three (3) signed originals and thirty-seven (37) copies of this revision are submitted for your review.

Very truly yours,

D. L. Peoples
Director of Nuclear Licensing
