THREE MILE ISLAND NUCLEAR STATION UNIT 1 (TMI-1)
OPERATING LICENSE NO. DPR-50
DOCKET NO. 50-289
TMI-1 FSAR REVISION NO. 1

Attached please find a revised TMI-1 FSAR table of effective pages and TMI-1 FSAR revised pages corresponding to Revision No. 1. These page changes were made necessary by (1) changes to the facility as described in the FSAR, and/or (2) changes to procedures as described in the FSAR, and/or (3) the conducting of tests or experiments not described in the FSAR which were performed pursuant to 10CFR 50.59. Further, revisions made necessary to reflect changes to the FSAR, which are of a typographical or editorial nature, are also included. For none of these revisions were unreviewed safety questions found. Documentation of the written safety evaluation for each particular subject revision are on file at Met-Ed, and a summary of them will be contained in the TMI-1 July 1 - December 31, 1975, Semi-Annual Operating Report.

Please insert these pages in your copy of the TMI-1 FSAR in accordance with the instructions provided with the revised pages.

Sincerely,

L. L. LAWYER
MANAGER
OPERATIONAL QUALITY ASSURANCE
