

JUN 13 1978

MEMORANDUM FOR: W. R. Butler, Chief, Plant System Branch, DOR
THRU: R. L. Ferguson, Section Leader, Plant Systems Branch, DOR
FROM: T. M. Lee, Plant Systems Branch, DOR
SUBJECT: TRIP REPORT - VISIT FOR FIRE PROTECTION EVALUATION

Facility: Three Mile Island Nuclear Station, Unit 1
Licensee: Metropolitan Edison Company
Docket No: 50-289
Responsible Branch: ORB #4
Project Manger: G. Zwetzig
Reviewing Branch: Plant Systems Branch
Requested Completion Date: December 31, 1978
Status: Site Visit Completed; Evaluation is On Going

On May 22-26, 1978, members of the NRC staff and their consultant met with the licensee's representative to visit the facility. The purpose of this visit was for NRC staff members to observe the plant features pertinent to the plant's fire protection program.

A list of participants from the NRC staff, the licensee and consultant is provided in Enclosure 1.

The visit followed the standard site visit agenda for fire protection. During the course of the visit, the staff's requests for additional information, which was transmitted earlier to the licensee, were also discussed. At the exit meeting, the staff provided numerous concerns and positions and requested the licensee's commitment to adopt them. The list of the concerns and positions is provided in Enclosure 2. The status of resolutions for such positions is provided in Enclosure 3.

In addition, the licensee provided a number of mechanical, electrical and structural drawings to facilitate the staff's evaluation of the fire protection program at the Three Mile Island, Unit 1 facility. These drawings are listed in Enclosure 4.
