**SUMMARY OF MEETING WITH METROPOLITAN EDISON COMPANY RE
THREE MILE ISLAND UNIT 1**

The meeting was held on September 20, 1973, for the purpose of arriving at the final version of the Environmental Technical Specifications for the Three Mile Island Unit 1 power plant. A list of attendees is included as Enclosure 1.

Each of the proposed Tech Specs was reviewed. Where there was still a disagreement between the applicant and the AEC staff the specification was analyzed and discussed until the wording was put in final form. If the applicant did not agree with the final version of each specification, he at least understood the reasoning behind the staff's position.

The applicant will furnish Section 5, Administrative Controls, by October 1, 1973. Upon review and approval of Section 5, the Technical Specifications will be completed for Three Mile Island Unit 1.
