Regulatory File Cy.

Dear Sir:

Three Mile Island Nuclear Station Unit 1 (TMI-1)
Operating License No. DPR-50
Docket No. 50-289

In accordance with the TMI-1 Environmental Technical Specifications Section 5.6.2.4 (Item #2, concerning changes made in or proposed for permits and/or licenses) enclosed please find the PaDER letter of June 27, 1977 amending Industrial Waste Permit (IWP) No. 2276209 and No. 2270204. Please be advised that these amendments allow our use of NALCO 41-L as a corrosion inhibitor in all TMI Closed Cooling Systems. It is our estimation that because NALCO 41-L will be used only in closed systems, and because the leakage from any of these systems is suitably treated prior to discharge, the environmental impact of these permit amendments will be negligible.

We trust this submittal to be satisfactory, however, if you should have any questions, please feel free to contact me.

Sincerely,

J. G. Herbein
Vice President

Dear Mr. Lawyer:

I am acknowledging your letter of June 14, 1977 about the use of NALCO 41-L. Industrial Waste Permit Nos. 2276209 and 2270204 were amended to include use of NALCO 41-L. Copies of the previous correspondence on this matter are enclosed. This letter further expands the above approvals to include NALCO 41-L in the remaining closed cooling systems.

Very truly yours,

James V. Donato
