Mr. Charles E. MacDonald, Chief
Transportation Certification Branch
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. MacDonald:

As requested by Sandia Laboratories, enclosed are eight copies of the consolidated MH-1A cask safety analysis report (SAR) submitted on behalf of the Department of Energy (DOE), which is now custodian of the MH-1A casks. As you know, the two MH-1A casks are physically stored at Savannah River.

We are requesting that Certificate of Compliance 71-6639 be reissued to permit DOE to use the MH-1A casks to transport TRIGA and MTR spent fuels as described in the SAR.

Sincerely,

John L. Ridihalgh
President
