

Docket Nos. 50-289
and 50-320

APR 24 1972

Metropolitan Edison Company
ATTN: John G. Miller
Vice President
P. O. Box 542
Reading, Pennsylvania 19603

Gentlemen:

In an effort to be more responsive to the needs of the public, the Commission has established a document room relating to your application for the Three Mile Island facility, Units 1 and 2, at the Government Publications Section, State Library of Pennsylvania, Box 1601, Education Building, Harrisburg, Pennsylvania 17126.

We have provided instructions as noted in the enclosed letter to the librarians in charge of these document rooms. However, we believe further assistance and guidance would be useful to them and request that you have one of your representatives make periodic checks of the materials available. In particular, your representative should assure that revised and supplemental information is properly incorporated in the application and safety analysis report, and that any other amendments, reports, and letters which you have filed with us are available. It is not necessary that you actually supply these documents as we will forward them to the document room, together with the documents originated by or for AEC such as the following: AEC letters requesting additional information, letters written to you by Regional Offices of the Division of Compliance, your Environmental Report, the Draft and Final Detailed Statements and all comments thereon, Safety Evaluations, the report of the Advisory Committee on Reactor Safeguards, all Federal Register notices, orders, permits, licenses, any advice rendered by the Attorney General and matters relating to the public hearing on your application (requests for limited appearances, petitions for intervention, orders and decisions of the Atomic Safety and Licensing Board, and hearing transcripts).

If you should encounter situations where documents of this type are missing, please provide them if you have them available. If not, please telephone

UNITED STATES
ATOMIC ENERGY COMMISSION
WASHINGTON, D.C. 20545

To

Librarians and Library Staffs

Reference: U. S. Atomic Energy Commission (AEC) Local Public Document
Room - Nuclear (Atomic) Power Plants and Facilities.

PURPOSE

The establishment by the AEC of local public document rooms or centers in areas where nuclear (atomic) power plants and facilities are proposed for construction or operation is to provide the public in the vicinity with access to the documentary materials connected with the licensing and public hearings involving such power plants and facilities, including information on the environmental aspects of the project.

USE AND CUSTODY OF MATERIALS

These are available to all members of the public for examination and copying (except that transcripts of proceedings may not be reproduced). It is important, however, that the examination and copying be confined to the library premises subject to observation of library personnel so that the file may be kept intact, and to avoid any of the materials becoming lost.

FILING OF AEC MATERIALS

The bulk of the material forwarded to you will usually be contained in binders or in ringed loose-leaf volumes. Additionally, we are supplying you with folders for filing other papers and documents. Each document will be labeled or appropriately marked for a particular file.

- (1) A folder tabbed "Amendments not included in Volumes or Binders" for the filing of documents that amend other documents in the file but which are unbound
- (2) A folder with the tab "Applicant File - Correspondence with Applicant" (excluding environmental and antitrust)
- (3) A folder with the tab "Environmental File - Environmental reports, comments, drafts and statements not included in binders or in ringed loose-leaf volumes
- (4) A folder with the tab "Antitrust File"
- (5) A folder with the tab "Public Hearing, including notices of hearing, safety evaluation, ACRS report, Initial Decision, and other decisions and orders"

1588 003

- (6) A folder with the tab "License and Construction Permit File (containing Construction Permits, Licenses, Amendments to Licenses and Construction Permits, Technical Specifications changes, incident reports, and inspection correspondence)
- (7) A Folder tabbed "Reports" (including operating reports, environmental monitoring reports)
- (8) A folder tabbed "Miscellaneous"

AVAILABILITY OF FURTHER INFORMATION AND DOCUMENT COPIES

If the library staff or any members of the public have any questions or are interested in any further information, they may write to the Director of Regulation, U. S. Atomic Energy Commission, Washington, D. C. 20545, or telephone (301) 973-7333.

The Safety Analysis Reports and Amendments thereto, DRL Safety Evaluations, Detailed Statements on Environmental Considerations, Licenses and Technical Specifications may be purchased by any member of the public through the Sales Desk, National Technical Information Service, Springfield, Virginia 22151. Telephone (703) 321-8543.
