J. P. O'Reilly, Chief, Reactor Inspection and Enforcement Branch, Division of Compliance, HQ

METROPOLITAN EDISON COMPANY - THREE MILE ISLAND NO. 1 AND 2
 DOCKET NOS. 50/289 and 50/320

The attached report of a management meeting on January 13, 1970 with Met-Ed and its principal contractors is forwarded for action. The purpose of the meeting was to discuss the results of the QA inspection which was performed during the weeks of December 1 and 8, 1969.

As was discussed in the previous inspection report (CO Report Nos. 289/69-6 and 320/69-2), the major QA deficiencies were in the Babcock and Wilcox program. We were encouraged by Mr. Miller's voluntary action to pursue improvements with the B&W Vice President. It is hoped that this action will result in significant improvements.

It is strongly recommended that an early reinspection be scheduled at B&W.

N. C. Moseley
 Senior Reactor Inspector
