Branch, Division of Compliance, HQ

METROPOLITAN EDISON COMPANY  
THREE MILE ISLAND UNITS 1 AND 2  
DOCKET NOS. 50-289 and 50-320

The enclosed report of inspection of the Metropolitan Edison Company's Three Mile Island 1 and 2 construction site, performed by J. H. Tillou, A. V. J. Burzi, and D. M. Hunnicutt, on June 24-25, 1971, is forwarded for information.

This licensee's continuing efforts to reinforce and amplify the site QA/QC surveillance activities are reassuring, although the efforts have been somewhat less than an unqualified success.

We have concerns regarding the continuing series of concrete problems which indicate repeated failure of the site personnel to implement the details of concrete placement procedures.

The work stoppage by the operating engineers was settled on July 9, 1971, so activity on site should gradually accelerate back to normal.

*E. M. Howard* (for)

E. M. Howard  
Senior Reactor Inspector
