

April 2, 1979

Dr. Hendue -

I strongly urge you and your constituents to oppose any shutdown of nuclear power plants now in operation, especially Three Mile Island, or any under present construction. Nuclear energy is greatly needed, in view of the energy crisis which has been hovering over our country for years - and will only worsen if we do not avail ourselves to nuclear power.

Thank you for listening to my views regarding nuclear energy, including Three Mile Island, and please do everything possible to insure their existence.

Sincerely,

Linda K. Heckert
