NRC Names New Senior Resident Inspector at FitzPatrick Nuclear Power Plant

The Nuclear Regulatory Commission officials in King of Prussia, Pa., have selected Eric Miller as the new senior resident inspector at the James A. FitzPatrick Nuclear Power Plant in Scriba, N.Y. The plant is operated by Exelon Nuclear.

Most recently, Miller was the senior resident inspector at the adjacent Nine Mile Point Nuclear Generating Station. He began his federal career in 2008 as a reactor engineer in the Office of New Reactors at NRC headquarters. He then joined the Region I staff as a reactor inspector in 2011. Miller earned bachelor's degrees in mechanical and nuclear engineering from Penn State University.

Miller joins resident inspector Greg Stock at FitzPatrick. Each U.S. commercial nuclear power plant site has at least two NRC resident inspectors. They serve as the agency's eyes and ears at the facility, conducting regular inspections, monitoring significant work projects, and interacting with plant workers and the public. Inspectors can serve for up to seven years at any one site.
