REVIEW OF TRANSMISSION LINES SECTION OF STATEMENT ON ENVIRONMENTAL CONSIDERATIONS RELATED TO PROPOSED ISSUANCE OF OPERATING LICENSE FOR THREE MILE ISLAND NUCLEAR STATION

I have reviewed the sections on transmission lines for the subject plant with particular reference to the 7.1 mile 500 KV line which comprises the tie between Peach Bottom and Juniata. I concur with the statement of the staff that "the proposed route for the TMI Juniata Transmission line represents the preferable approach and will not have a significant adverse impact on the environment."

I believe that the statement is adequate. I recommend that the Final Environmental Statement be issued in its present form.
