NOV 19 1974

Docket Nos. 50-320
50-289

Mrs. Lydia Ticky
9711 Snowville Road
Brecksville, Ohio 44141

Dear Mrs. Ticky:

Your letter of November 4, 1974, to Chairman Ray has been referred to this office for reply.

The lack of specificity in your statement precludes our making a confident response to your specific question on warning signs around storage tanks. We believe, however, that you may be referring to the recently conducted operation of mixing and tanking of low-level radioactive waste from the Three Mile Island Nuclear Station, Unit 1 (TMI-1).

Warning signs, one of many types of normal and necessary safety precautions, were used by the TMI-1 management to advise site personnel of the potential hazard in the work and storage area. These are conducted using standards and procedures approved by the AEC. These procedures provide assurance of properly conducted operations and adequate personnel safety.

In response to your request for pamphlets, I am enclosing one copy of each of the following:

- Radioactive Wastes
- Atomic Power Safety
- Nuclear Power Plants - How Safe Are They?

Sincerely,

Copy sent PLM
