Metropolitan Edison Company
ATTN: Mr. John L. Wise
Superintendent
Three Mile Island Nuclear
Generating Station
P. O. Box 480
Middletown, Pennsylvania 17057

Gentlemen:

This is in reply to your letter, dated December 6, 1972. Your letter contained additional information regarding individuals who intend to submit applications for senior operator licenses at the Three Mile Island Nuclear Generating Station.

We have determined that the individuals indicated as "B", "C", "D" and "E" will be eligible for "cold" examinations on Unit No. 2 provided:

1. Each individual successfully complete the training programs described in your letters, dated October 16, 1972 and December 6, 1972.
2. Each individual manipulate the controls of Unit No. 1 through at least five (5) reactivity changes. The reactivity changes may consist of any combination of the following:
 - a. Reactor startups
 - b. Power Changes of at least 10%
 - c. Orderly reactor shutdowns.

Mr. H. C. DeYoung, Assistant Director of Power Water Reactors, Directorate of Licensing, has informed you that the individual indicated as "E" does not meet the requirements for Shift Foreman. You may wish to take this into consideration in determining whether he should sit for a senior operator license examination.

I hope this information will be of use to you.

Sincerely,

POOR ORIGINAL

1st Paul F. Collins, Chief
Operator Licensing Branch
Directorate of Licensing
