DOCKET NUMBER *DP - Miss Notice*  
PROPOSED RULE *Reg Guide*

Secretary of the Commission  
U.S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attention: Docketing and Service Branch

Gentlemen:

Regulatory Guide 1.145, "Atmospheric Dispersion Models for Potential Accident Consequence Assessments at Nuclear Power Plants", was published for review and comment in August, 1979.

Our review of this Guide indicates that meaningful review and comment can be performed only after release and study of the pertinent computer program which the Commission now is developing. Accordingly, we suggest that the comment period be kept open for a reasonable time after that date and not closed out in the normal two-month period.

Sincerely,

*Raymond Baxter*  
R. C. Baxter
