Re: Final Generic Environment Impact Statement-Handling
and Storage of Spent Light Water Power Reactor Fuel

Dear Sir:

The State Historic Preservation Officer and his staff have reviewed the above document with regard to National Historic Preservation Act compliance by the participating federal agency. Section 106 compliance procedures are prescribed in the Advisory Council on Historic Preservation procedures for the Protection of Historic and Cultural Properties, 36 CFR 800. Due to the generic nature of the above document our only comment at this time is to recommend that specific site selection in Tennessee be coordinated with our office to insure compliance with Section 106.

Please contact us at any time. Your cooperation will be appreciated.

Sincerely,

Herbert L. Harper,
Executive Director and
State Historic Preservation Officer
