Mr. Charles E. MacDonald, Chief
Transportation Branch
Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. MacDonald:

In accordance with our commitment to provide the Nuclear Regulatory Commission with our Quality Assurance Plan by October 31, 1979, enclosed are seven copies of the subject document.

As you will see, the document submitted covers all aspects of our company's operations, not just those which are regulated by the NRC. We understand that in our case the NRC is primarily concerned with radioactive shipments. This subject is highlighted in Section IV 1.4 of the document.

The plan as written is based on the procedures which have been developed as the company has grown and matured. These procedures, in turn, have changed with time. We will, in accordance with Section VII of the QA plan, conduct a systematic review of the existing procedures in order to provide assurances that these procedures are up-to-date. This review will be continual and the QA Manager will periodically document the results of this activity.

We appreciate the helpful guidance provided by John Gilray and Jim Conway of your staff and hope that you will find this document to be satisfactory.

Sincerely,

NEUTRON PRODUCTS, INC.

Carmine Smedira
