Director of Nuclear Reactor Regulation
ATTN: Mr. W. P. Gammill
Acting Assistant Director
Operating Reactor Projects
U. S. Nuclear Regulatory Comm.
Washington, D. C. 20555

Subject: Arkansas Nuclear One-Units 1 & 2
Docket Nos. 50-313 and 50-368
License Nos. DPR-51 & NPF-6
Radiation Safety Training
(File: 0765, 2-0765)

REF: Your letter of October 2, 1979
to all Power Reactor Licensees

Dear Mr. Gammill:

The basic CRAU radiation safety course that you have proposed appears to be sufficient with one exception. The AP&L basic course is designed to cover the requirements of 10 CFR 19 and includes site specific radiological training. If you can supply a certificate for each of your personnel stating that they have been instructed in the 10 CFR 19 requirements (except the site specific sections), AP&L will accept the basic radiation safety certification and will provide site specific training for NRC personnel.

If you have questions concerning this matter, please contact me.

Very truly yours,

David C. Trimble
