Mr. Darrell G. Eisenhut, Acting Director
Division of Operating Reactors
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Zion Station Units 1 and 2
Response to NRC Requirements for
Auxiliary Feedwater Systems
NRC Docket Nos. 50-295 and 50-304

- References (a): October 19, 1979 letter from D. L. Peoples
to D. G. Eisenhut transmitting Zion Station's
response to NRC requirements for Auxiliary
Feedwater Systems
- (b): September 18, 1979 letter from D. G. Eisenhut
to C. Reed transmitting "NRC Requirements for
Auxiliary Feedwater Systems at Zion Station
Units 1 and 2."

Dear Mr. Eisenhut:

In Reference (a), Commonwealth Edison Company committed to providing the NRC Staff with a schedule for responding to the Staff's generic request for additional information regarding auxiliary feedwater system flow requirements. The information requested is outlined in Enclosure 2 to Reference (b).

The Westinghouse Operating Plant Owners' Group has declined to include in its scope the NRC Staff's generic request. Therefore, Commonwealth Edison has contracted Westinghouse to provide the requested information for the Zion units. Currently, Commonwealth Edison estimates that the requested information will be available for submittal to the NRC Staff by March 21, 1980.

Please address any questions that you might have concerning this matter to this office.

One (1) signed original and thirty-nine (39) copies of this letter are provided for your use.

Very truly yours,

D. L. Peoples

D. L. Peoples
Director of Nuclear Licensing
