

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555
November 5, 1979

Docket No. 50-10

Mr. D. Louis Peoples
Director of Nuclear Licensing
Commonwealth Edison Company
Post Office Box 767
Chicago, Illinois 60690

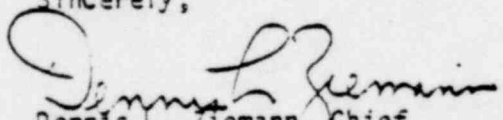

Dear Mr. Peoples:

RE: COMPLETION OF SEP TOPIC IV-1.A - DRESDEN 1

Your letter dated March 13, 1979, indicated that you have examined our draft evaluation of the subject topic transmitted by our letter dated January 16, 1979. You have indicated that the facts upon which the staff based its evaluation are correct. Since you have not identified any factual errors in our draft evaluation, our review of SEP Topic IV-1.A is complete and this evaluation will be a basic input to the integrated safety assessment for your facility.

The subject assessment compares your facility design with the criteria currently used by the staff in licensing new facilities. This assessment may need to be re-examined if you modify your facility or if the criteria are changed before we complete our integrated assessment.

Sincerely,

Dennis L. Ziemann, Chief
Operating Reactors Branch #2
Division of Operating Reactors
