Docket No. 99900369/79-01

U.S. Nuclear Regulatory Commission  
Region IV  
611 Ryan Plaza Drive - Suite 1000  
Arlington, Texas 76012

Attention: Mr. Uldis Potapovs, Chief  
Vendor Inspection Branch

Re: Nuclear Regulatory Commission Review of Automatic Switch  
Company Quality Assurance Program - July 10-13, 1979

Gentlemen:

This is in response to your letter of September 28, 1979 requesting additional information to complete the subject survey.

Your Mr. W. Foster telephoned our Mr. L. S. Olsen on September 25 to determine what steps had been taken to correct the document identified in item "B" of the Notice of Deviation. In our letter of August 28, 1979 we made the following statement:

"RESOLUTION - DEVIATION B

Corrective Action - None. Current procedures reflect required action desired.

Preventive Action - Production Control has assigned one individual to handle all nuclear orders. Any changes or modifications to an existing shop order will be made by this individual.

Effective Date - Assignment made on August 1, 1979."

We were remiss in not stating that the shop order in question had been updated and certified by an authorized person, indicating the construction was made to the latest change letter. The change to the shop order was initiated on August 28, 1979 and we are enclosing a copy of the order for your information. The initials "WB" are for the Planner who located the shop order in our assembly area, and the initials "GG" are for the Supervisor in the Production, Planning and Control Department who authorized the change.
