Trojan Nuclear Plant
Docket 50-344
License NPF-1

Director of Nuclear Reactor Regulation
ATTN: Mr. A. Schwencer, Chief
Operating Reactors Branch #1
Division of Operating Reactors
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

Specification 4.2.3.1 of Appendix B to the Trojan Operating License (FOL), NPF-1, outlines procedures to be followed if milk samples cannot be obtained as specified in Table 4-2 of Appendix B. Milk samples are currently required by Table 4-2 to be taken monthly from Kelso (Dudonski Dairy), listed as Location 15. This dairy is no longer operational and, from all indications, will not resume operations in the foreseeable future. In accordance with Sections 4.2.3.1 and 5.5.3(b) of Appendix B of the Trojan FOL, NPF-1, you are hereby advised that milk samples are no longer being taken from this sampling location.

Although no suitable alternative to this site is currently available, Portland General Electric Company (PGE) is maintaining a continual awareness of milk-producing animals in the Trojan environs. Should Kelso (Dudonski Dairy) again become operational or should another suitable milk sampling site develop, PGE will initiate a sampling program from these locations as soon as possible. Should you have questions or concerns, please do not hesitate to contact me.

Sincerely,

C. Goodwin, Jr.
Assistant Vice President
Thermal Plant Operation and
Maintenance

CG/GAZ/4mg7B7
