Materials Safety
U. S. Nuclear Regulatory Commission
Washington, DC 20555

Docket 71-6144

Dear Mr. MacDonald:

Nuclear Engineering Company, Inc. hereby requests renewal of
Certificate of Compliance No. 6144.

We note that the subject shipping package is customarily known
in the industry as a model "B-2" as opposed to "6144" used in
the certificate. We would request that the references in the
certificate be revised when renewed in order to reflect the
customary usage.

In your letter to us dated September 13, 1979, we were requested
to provide a consolidated safety analysis report in support of
this application. In spite of our best efforts, this report is
not yet complete. It is our present intention to submit the
report to your attention before the close of this year. We
trust that this will be satisfactory to you.

It is our understanding that the certificate will remain in
full force and effect until final action on this application
is taken by the Commission pursuant to 10 CFR 2.109.

Our check in the amount of \$150.00 is enclosed as payment in
full for renewal pursuant to 10 CFR Part 170.

Sincerely,

1546 298

NUCLEAR ENGINEERING COMPANY, INC.
