

DOCKET NO. 50-313

NOV 27 1979

Baltimore Gas and Electric Company  
ATTN: Mr. A. E. Lundvall, Jr.  
Vice President - Supply  
P.O. Box 1475  
Baltimore, Maryland 21203

REGULATORY DOCKET FILE COPY

Gentlemen:

We have received a copy of each of your submittals dated July 11, 1979, September 7, October 10 and November 12 which you filed with the Office of Nuclear Reactor Regulation (ONRR) for review and approval. These letters transmitted data relating to Cycle 3 operation of the Calvert Cliffs Nuclear Power Plant Unit No. 2 with sleeved guide tubes in fuel assemblies under Control Element Assemblies. The ONRR staff's review and approval of this data are documented in a November 19, 1979 letter and Safety Evaluation Report sent to your Company.

Pursuant to the provisions of 10 CFR 170, and based on guidance from the ONRR staff, it has been determined that review and approval of the Guide Tube Inspection Program data involved consideration of a single safety issue requiring a Class III fee of \$4,000. It is requested that this fee be forwarded to us as promptly as possible.

Sincerely,  
Original Signed by  
Wm. O. Miller
