Frank A. Traylor, M.D.
Executive Director

November 9, 1979

Robert G. Ryan, Director
Office of State Programs
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Ryan:

Thank you for your letter of October 25 describing your recent visit and investigation of our Radiation Control Program. I fully concur with your findings and suggestions. The Legislative Committee is currently investigating our program with a purpose of making legislative changes next spring. There is widespread support in the Legislature to fund our Radiation Control Program more fully with the resulting purchase or lease of data processing or word processing equipment and the contracting of personnel to staff the program more fully. I hope by sharing your comments with these legislators, there will be further impetus to improve our program.

I appreciate your visits and constructive observations. At the time of your next visit, I hope that we will be able to show that the defects of the program have been corrected.

Sincerely yours,

Frank Traylor, M.D.
Executive Director
