POOR ORIGINAL

4. Description

Components and associated equipment of a boiling water reactor, with a power level of 2,436 megawatts (thermal) valued at approximately \$12,600,000 including equipment and material listed in paragraph a of Appendix A to US regulations 10 CFR Part 110.

5. All other conditions remain the same. An amendment superseding the original license issued April 2, 1971 and all three subsequent amendments through July 8, 1975 would be appreciated.

Very truly yours,

B. D. Wilson, Manager  
Government Relations and  
Export Licensing
