Washington, D. C. 20555

Attention: Mr. Robert L. Baer, Chief
Light-Water Reactor Branch No. 2

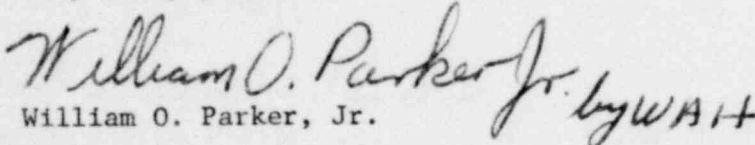

Re: McGuire Nuclear Station
Units 1 and 2
Docket Nos. 50-369, -370

Dear Mr. Denton:

In a letter dated November 2, 1978, responses to NRC staff positions on fire protection (transmitted by the staff's letter of September 6, 1978) were submitted. This letter included a draft copy of the test report on penetrations through fire barriers along with a commitment to provide the final report when completed. Attached are three copies of the final version of this test report entitled, "Fire Qualification Test on Silicone Foam Floor Penetration Seals."

The staff has accepted this matter based on review of the draft report and documented their review in Supplement 2 to the McGuire Safety Evaluation Report. There are no significant differences between the draft report and this final report.

Very truly yours,

William O. Parker, Jr.
