Docket No. 30-10305

SEP 26 1979

The Lummus Company
ATTN: Gerald Gothick
1515 Broad Street
Bloomfield, New Jersey 07003

Gentlemen:

SUBJECT: NOTICE OF EXPIRED LICENSE

This refers to the telephone discussion between Mr. F. Augustine, Jr. of this office and Gerald Gothick of your organization on August 17, 1979.

NRC records show that the Byproduct Material License identified above has expired and no renewal application has been filed in accordance with Section 30.37 of Title 10, Code of Federal Regulations, Part 30.

From our discussion with your representative we learned that you still possess material which requires a specific NRC license. Your possession of that material without a valid, specific license is a violation of Section 30.3, 10 CFR Part 30.

If you desire to continue use of licensed material, you must immediately submit the enclosed NRC Form 313, "Application for Byproduct Materials License" to the USNRC, Division of Fuel Facility and Materials Safety, License Management Branch, Washington, D. C. 20555. A copy of the letter forwarding the application to the License Management Branch (but not the application) should be sent to Region I, U.S. Nuclear Regulatory Commission, 631 Park Avenue, King of Prussia, Pennsylvania, 19406, ATTN: Mr. R. O. McClintock, Chief, Materials Radiological Protection Section, Fuel Facility and Materials Safety Branch.

Also, you must place the radioactive material on hand in secure storage until such time as you acquire a valid license; no other use of the material on hand or purchase of additional byproduct material is authorized.

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee as required by Section 170.31, 10 CFR Part 170 and, if one is required, submit the appropriate fee along with the application.
