Docket No. 030-7010

JUL 31 1979

License No: 29-13025-01
Expiration Date: November 30, 1978

St. Mary's High School
ATTN: Thomas Phillips
Stevens and Augusts Streets
South Amboy, New Jersey 08879

Gentlemen:

SUBJECT: NOTICE OF EXPIRED LICENSE

This refers to the telephone discussion between Mr. F. Augustine, Jr. of this office and yourself on June 1, 1979.

NRC records show that the Byproduct Material License identified above has expired and no renewal application has been filed in accordance with Section 30.37 of Title 10, Code of Federal Regulations, Part 30.

From our discussion with your representative we learned that you still possess material which requires a specific NRC license. Your possession of that material without a valid, specific license is a violation of Section 30.3, 10 CFR Part 30.

If you desire to continue use of licensed material, you must immediately submit the enclosed NRC Form 313, "Application for Byproduct Materials License" to the USNRC, Division of Fuel Facility and Materials Safety, License Management Branch, Washington, D. C. 20555. A copy of the letter forwarding the application to the License Management Branch (but not the application) should be sent to Region I, U.S. Nuclear Regulatory Commission, 631 Park Avenue, King of Prussia, Pennsylvania, 19406, ATTN: Mr. R. O. McClintock, Chief, Materials Radiological Protection Section, Fuel Facility and Materials Safety Branch.

Also, you must place the radioactive material on hand in secure storage until such time as you acquire a valid license; no other use of the material on hand or purchase of additional byproduct material is authorized.

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee as required by Section 170.31, 10 CFR Part 170 and, if one is required, submit the appropriate fee along with the application.

A copy of the statement shall be sent, within fifteen (15) days of the receipt of this letter, to Region I, U.S. Nuclear Regulatory Commission, 631 Park Avenue, King of Prussia, Pennsylvania, 19406, ATTN: Mr. R. O. McClintock, Chief, Materials Radiological Protection Section, Fuel Facility and Materials Safety Branch.

JUL 31 1979

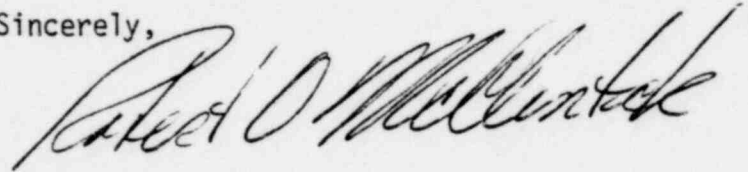

Also, if the activities conducted under the expired license were subject to the reporting requirements of 10 CFR 20.407, you must submit the annual report required by 20.408 for individuals engaged in activities under the expired license. Those reports must be submitted to the Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555, ATTN: Mr. J. B. Winningham.

If you desire to reactivate your program of licensed activities, you must submit the enclosed NRC Form 313, "Application for Byproduct Materials License", to the USNRC, Division of Fuel Facility and Materials Safety, License Management Branch, Washington, D. C. 20555. A copy of the letter forwarding the application to the License Management Branch (but not the application) should be sent to Region I, U.S. Nuclear Regulatory Commission, 631 Park Avenue, King of Prussia, Pennsylvania, 19406, ATTN: Mr. R. O. McClintock, Chief, Materials Radiological Protection Section, Fuel Facility and Materials Safety Branch.

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee under Section 170.31 of 10 CFR Part 170 and, if one is required, you must submit the appropriate fee along with the application.

We request that you give prompt attention to these matters.

Sincerely,

Robert O. McClintock, Chief
Materials Radiological Protection
Section
