Based on the results of an NRC inspection conducted on October 24, 1979 it appears that certain of your activities were not conducted in full compliance with the conditions of your NRC license as indicated below:

- A. License Condition 1 requires that each lot of timepieces, hands, and dials containing tritium imported into the United States be accompanied by a certification that the tests prescribed in this license condition have been performed, and that the results of these tests were satisfactory.

Contrary to this requirement, as of October 24, 1979, you have imported and distributed timepieces from a supplier without having received the required certifications.

This is an infraction.
