Docket No. 30-9387

OCT 20 1978

Tenneco Chemicals, Incorporated
ATTN: Mr. J. K. Schmitz
Foam and Plastics Division
Nixon, New Jersey 08818

License No. 29-10646-02
Expiration Date: April 30, 1978

Gentlemen:

SUBJECT: NOTICE OF EXPIRED LICENSE

This refers to the telephone discussion between Mr. F. Costello of this office and yourself on October 10, 1978.

NRC records show that the Byproduct Material License identified above has expired and no renewal application has been filed in accordance with Section 20.37 of Title 10, Code of Federal Regulations, Part 30.

From our discussion with your representative we learned that you still possess material which requires a specific NRC license. Your possession of that material without a valid, specific license is a violation of Section 30.3, 10 CFR Part 30.

If you want to continue your program, you must immediately submit the enclosed NRC Form 313, "Application for Byproduct Materials License" to the Radioisotopes Licensing Branch, Office of Nuclear Materials Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C., 20555. A copy of the letter forwarding the application to the licensing branch (but not the application) should be sent to Region I, U.S. Nuclear Regulatory Commission, 631 Park Avenue, King of Prussia, Pennsylvania, 19406, ATTN: Mr. R. O. McClintock, Chief, Materials Radiological Protection Section, Fuel Facility and Materials Safety Branch.

Also, you must place the radioactive material on hand in secure storage until such time as you acquire a valid license; no other use of the material on hand or purchase of additional byproduct material is authorized.

Tenneco Chemicals, Incorporated

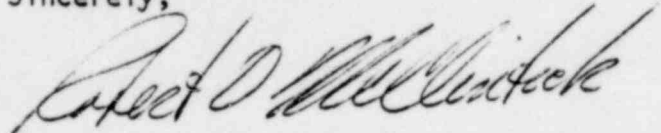

2

OCT 20 1973

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee as required by Section 170.31, 10 CFR Part 170 and, if one is required, submit the appropriate fee along with the application.

We request that you give prompt attention to these matters.

Sincerely,

Robert O. McClintock, Chief
Materials Radiological Protection
Section
