Division of Fuel Facility and Materials Safety Inspection  
Washington, D.C. 20555

RE: Bulletin # 79-19

We ship no low level radioactive waste to any of the three waste burial facilities.

The only radioactive waste we ship are our expired generators which we ship to our manufacturers to refill after decay has taken place. At that time we take readings on all the containers to be shipped back, record and attach the appropriate label per DOT specifications.

Our license # is 13-16730-01
