Mr. A. B. Davis, Chief  
Fuel Facility and Materials  
Safety Branch  
Nuclear Regulatory Commission  
Region III  
799 Roosevelt Road  
Glen Ellyn, IL 60137

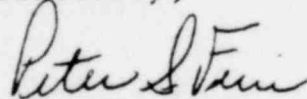

Dear Mr. Davis:

In reference to the letter we received from you dated November 28, 1979, dealing with the inspection conducted by Ms. D. Matson, the following has been accomplished to rectify the areas where we were found to be in noncompliance.

1. The utility closet now is locked with a key lock and access is only available by the employees of the Nuclear Medicine Department.
2. The hot laboratory has also been put on a key lock with access only to the Nuclear Medicine Department.

This has already been accomplished and at this point satisfies the infractions that were noted.

Sincerely,

Peter S. Fine  
Assistant Administrator
