

OFICINA DEL RECTOR

January 16, 1981

J. Philip Stohr, Chief
Fuel Facility and Materials
Safety Branch
U. S. Nuclear Regulatory
Commission
101 Marietta St. N. W., Suite 3100
Atlanta, Georgia 30303

Dear Sir:

This is in response to your letter and appendix A,
notice of violation dated December 24, 1980.

1. It is correct that areas classified as medium level areas in the License Application dated October 16, 1978, were not surveyed weekly to determine radiation and contamination levels.
2. Due to the fact that radioactive materials arrive every Monday morning, HPO staff checks the packages and keeps records of the procedures followed for such inspection but results of radiation and contamination levels in Hot Room have not been also recorded in the HPO-Forms 09 and 010 made for recording results of radiation and contamination levels during regular radiation protection inspection procedures. Normally, on Monday morning all laboratories of Nuclear Medicine facilities show background levels exception made of the Hot Room.
3. Nuclear Medicine facilities are identified as areas of the Medical Sciences Campus where a greater risk of contamination and/or radiation exposures exist. Health Physics Office Staff is aware of such condition and maintains a continuous radiation monitoring of those areas and immediate emergency services. It is satisfactory to say that during the last calendar year, radiation exposures of Nuclear Medicine employees were far below the Investigational Levels of the ALARA Programs.

Page 2

4. Starting December, 1, 1980 radiological surveys are being carried out weekly in areas used for the preparation of radiopharmaceuticals and elution of Mo-99/Tc-99m Generators (Please see enclosed Forms used to record the results of surveys and smears). Once a month weekly surveys are complemented with a comprehensive radiation safety inspection of each room where radioactive material is handled or stored.
5. December 1, 1980 is the date when full compliance has been achieved.

If any other additional information is required do not hesitate to contact us.

Cordially yours,

Norman Maldonado, M.D.
Chancellor
Medical Sciences Campus
