

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

AUG 07 2019

Kyle Bauer
Radiation Safety Officer
Patriot Engineering and Environmental, Inc.
6150 E 75th St.
Indianapolis, IN 46250

Dear Mr. Bauer:

Enclosed is Amendment No. 7 renewing your NRC Material License No. 13-32725-01 in accordance with your request. In the letter dated July 9, 2019, you requested to remove the locations of use located at 6330 E. 75th St., Indianapolis, IN, 46250, and 2536 West Industrial Park Dr., Ste. 213, Bloomington IN, 47404, from your license. Based on the information provided, the NRC staff has concluded that all licensable radioactive material has been removed from the locations above and the residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Therefore, you may release 6330 E. 75th St., Indianapolis, IN, 46250, and 2536 West Industrial Park Dr., Ste. 213, Bloomington IN, 47404, for unrestricted use.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's

electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <https://www.nrc.gov/docs/ML1619/ML16196A237.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <https://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

In accordance with Title 10 of the Code of Federal Regulations (CFR) 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Erin J. Kennedy
