Mr. William M. White, Chief
Division of River Basin Studies
Bureau of Sport Fisheries and Wildlife
U. S. Department of the Interior
Washington, D. C. 20240

Dear Mr. White:

Jersey Central Power & Light Company and Metropolitan Edison Company have jointly filed Amendment No. 6 to facility license application for the previously designated Oyster Creek Unit 2 nuclear reactor. The applicants have selected as a new site for the reactor the Three Mile Island Nuclear Station in Dauphin County, Pennsylvania, and have redesignated the reactor as the Three Mile Island Nuclear Station Unit 2.

Two sets of Volumes 1 through 4 of the Preliminary Safety Analysis Report (PSAR) for the Three Mile Island Nuclear Station Unit 2 are enclosed. This PSAR contains all information previously furnished in the Oyster Creek Unit 2 PSAR and amendments thereto. In addition, new information is provided that concerns site-related changes as identified in the index. Two additional sets of the report are enclosed for your convenience in coordinating the Fish and Wildlife Service's review with the Federal Water Pollution Control Administration.

Because the site features were reviewed previously for Metropolitan Edison Company's Three Mile Island Unit 1 and since the proposed Unit 2 is similar to Unit 1 now under construction, it may be possible in certain cases to merely reference the applicability of your previous report on Unit 1. However, in areas not considered previously, we would appreciate your prompt review and comments.

Sincerely yours,

Original signed by
Robert L. Tedesco

Roger S. Boyd, Assistant Director
for Reactor Projects
Division of Reactor Licensing
