MEMORANDUM FOR: Robert Budnitz, Deputy Director, NRR
FROM: John Ahearne 
SUBJECT: RES TMI ACTIONS

I have scanned the RES TMI actions list enclosed in the 16 April memo from the EDO. Please identify the proposals where the following questions will be addressed:

1. What instrumentation can be incorporated into reactors to give a direct reading of water level in the reactor vessel?
2. What method can be used to give operators a direct reading as to whether a relief valve is open or closed?
3. What adaption can be incorporated to permit removal of gas bubbles from sensitive areas?
4. What is the latest description of the hydrogen bubble problem?
