Docket No. 50-346

License No. NPF-3

Serial No. 526

July 9, 1979

Director of Nuclear Reactor Regulation  
Attention: Mr. Robert N. Reid, Chief  
Operating Reactors Branch No. 4  
Division of Operating Reactors  
United States Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Reid:

In discussions with your staff about the Davis-Besse Nuclear Power Station, Unit 1 (DB-1) fire protection system we agreed to formally identify the commitment date to provide the long term back-up service water intertie between Units 1 and 2. The capability is discussed on page Q 11-3 (Rev.4) of the DB-1 Fire Hazards Analysis. Toledo Edison is committed to have a system with a service water back-up not dependent on offsite power by July, 1984.

Very truly yours,

A handwritten signature in cursive script, appearing to read 'Lowell E. Roe'.
