Re: Docket No 40-8698 Shootering Canyon Uranium Project

Dear Mr. Garcia:

Attached are four copies of Woodward-Clyde Consultant's report "Ground-water Monitoring Wells - Shootering Canyon Uranium Project". This report presents details of the wells that have been drilled for the project pre-operational radiological monitoring program. Also it includes a figure showing WCC's estimates of groundwater contours for the Entrada aquifer in the vicinity of the project tailings impoundment area.

Please advise if you need additional information.

Sincerely,

for R B Sewell
