Re: **NOTIFICATION OF TERMINATION OF LICENSE USE AT THE
FORMER HUNTERS POINT NAVAL SHIPYARD, SAN FRANCISCO,
CALIFORNIA UNDER US NRC RADIOACTIVE MATERIALS LICENSE
09-29309-01, DOCKET NO. 030-38878**

Dear Administrator:

Up-side Radiological Services, LLC (USRS), has concluded performing certain activities at the Former Hunters Point Naval Shipyard (HPNS), San Francisco, San Francisco County, CA under the USRS's Nuclear Regulatory Commission (NRC) Radioactive Materials License listed above. In accordance with license condition 10, USRS concluded activities under our license on June 30, 2019.

USRS provided initial notification of our license activities to the California Department of Public Health, Radiological Health Branch and to the U.S. NRC Region IV on December 6, 2018 for activities continuing on January 1, 2019. USRS was a subcontractor to the Army's Low Level Radioactive Waste (LLRW) executive agency of the Rock Island Joint Munitions Command (JMC) under Contract No. W52P1J-16-D-0036, Project Number USN 2019-002.

The activities USRS performed were limited to waste profiling, waste storage, waste packaging, and waste transportation, at the former HPNS, San Francisco, California. Three total waste bins were shipped off-site. One waste bin was 11 cubic yards of soil containing 0.38 Megabecquerels (MBq) of radium-226 (²²⁶Ra) contamination. One waste bin was 14 cubic yards of soil containing 3.18 MBq of ²²⁶Ra. The 3rd waste bin was 9 cubic yards of debris containing 0.14 MBq of ²²⁶Ra contamination. A 55-gallon drum was also shipped off-site for disposal that contained approximately 4 cubic feet of material containing 11.02 MBq of ²²⁶Ra contamination.

Pursuant to license condition 13, the delineation of license responsibilities was documented in a Memorandum of Understanding (MOU) between the Department of the Navy's Naval Facilities Engineering Command (Base Realignment and Closure Office), USRS, the prime contractor, Gilbane Federal (Gilbane), ECC, Wood E&IS, and APTIM (formally Chicago Bridge and Iron (CB&I)), in consultation with the Department of the Navy's Radiological Affairs Support Office (RASO), that was executed and in place prior to work starting in December 2018. The MOU has since been rescinded.

Mr. Willie Bremer was identified as the Radiation Safety Office Representative and was an authorized user for this project. Mr. Bremer would have been reached at (925) 209-3887.

The initial processing, which included an administrative review, has been performed.
 Amendment Termination New License Renewal

There were no administrative omissions identified during our initial review.

This is to acknowledge receipt of your application for renewal of the material(s) license identified above. Your application is deemed timely filed, and accordingly, the license will not expire until final action has been taken by this office.

Your application for a new NRC license did not include your taxpayer identification number. Please complete and submit NRC Form 531, Request for Taxpayer Identification Number, located at the following link: <http://www.nrc.gov/reading-rm/doc-collections/forms/nrc531.pdf>
 Follow the instructions on the form for submission.

The following administrative omissions have been identified:

Your application has been assigned the above listed MAIL CONTROL NUMBER. When calling to inquire about this action, please refer to this control number. Your application has been forwarded to a technical reviewer. Please note that the technical review, which is normally completed within 180 days for a renewal application (90 days for all other requests), may identify additional omissions or require additional information. If you have any questions concerning the processing of your application, our contact information is listed below:
