Nuclear Regulatory Commission  
Washington, DC 20555

Dear Sirs:

In 1978 we applied for a 5-year extension of our nuclear by products license number 13-057-3701, and in 1980 requested that it be amended to include a 15 mCi  $Ni^{63}$  source which we had recently obtained. We have no confirmation that the license has been extended and/or amended; on the other hand, we have received no indication of non-compliance. I would appreciate receiving some verification that our license is in order.

Sincerely,

*Samuel H. Neff*
