Nuclear Regulatory Commission

To Whom It May Concern:

The Nuclear Plant in Harrisburg has brought great attention of the United States and of the world. I personally believe that nuclear energy is mainly a good source of energy for the people, but in my opinion, it is still not considered safe.

I am suggesting that instead of building more of these nuclear plants, which are possibly harmful to man, you invest your money in technology whereby you can make nuclear plants and their radioactive wastes totally safe.

Keep in mind, gentlemen, you are dealing with lives of people.

Sincerely,

Hugh G. Nolan
