

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

Docket Nos. STN 50-596
and STN 50-597

JUN 04 1979

Mr. Hugo G. Guzman
149 West Bridge Street
Oswego, New York 13126

Dear Mr. Guzman:

SUBJECT: NEW HAVEN 1 & 2 - EMERGENCY PLANNING

In response to your request at the Special Prehearing Conference in Oswego on May 22, 1979, I am enclosing several documents which you may find useful in continuing your research on emergency planning for Oswego County.

Enclosure 1 is a copy of Appendix E to Part 50 of Title 10 of the Code of Federal Regulations (10 CFR 50, Appendix E). This appendix establishes the minimum requirements, in the area of emergency planning, which each applicant for a construction permit or operating license must address in its Safety Analysis Report. A complete copy of Title 10 of the Code of Federal Regulations and a copy of the New Haven 1 and 2 Preliminary Safety Analysis Report are on file in the Local Public Document Room (LPDR) located at the Office of the Clerk of the Oswego County Legislature, Oswego County Office Building, 46 East Bridge Street, Oswego, New York and at the U. S. Nuclear Regulatory Commission Public Document Room, 1717 H Street, N. W., Washington, D. C.

Enclosure 2 is a copy of Regulatory Guide 1.101, "Emergency Planning for Nuclear Power Plants." This regulatory guide provides guidance to applicants in developing adequate plans for coping with emergencies. It describes a method, acceptable to the NRC staff, for complying with 10 CFR 50, Appendix E.

Enclosure 3 is a copy of Section 13.3 of our Standard Review Plan, "Emergency Planning." This document provides guidance to NRC staff personnel who perform the safety review of applications to construct or operate nuclear power plants.

Enclosure 4 is a report entitled, "Guide and Checklist for Development and Evaluation of State and Local Government Radiological Emergency Response Plans in Support of Fixed Nuclear Facilities," (NUREG-75/111, with Supplement No. 1 enclosed). The purpose of this document is to provide a common reference and guidance source for: (1) State and local governments in the preparation of radiological emergency response plans in support of fixed nuclear facilities, and (2) NRC and other Federal agency personnel engaged in the review of such State and local government plans.

JUN 04 1979

Enclosure 5 is a copy of the "New York State Emergency Plan for Radiation Accidents," (revised December 28, 1978). Several of the appendices are distributed separately; however, I have included as Enclosure 6, a copy of "Radiation Response Plan - Nine Mile Point Facilities - Specific Operating Procedures - Major Radiation Incidents." This plan was approved by the Chairman, Oswego County Legislature in May 1978 and is Appendix H to the "New York State Emergency Plan for Radiation Accidents." Of course, the plan for the Nine Mile Point facilities would either have to be revised or a new plan would be written to cover incidents at the New Haven site, should the proposed New Haven facilities be built.

In addition to these six documents, I have asked the Environmental Protection Agency to forward to you directly a copy of its report entitled "Evacuation Risks - An Evaluation," (EPA-520/6-74-002). This document provides an assessment of the risk of death, injury, and cost associated with an evacuation of population groups affected by an incident at a fixed nuclear facility.

I hope you will find these documents useful. If I can be of further assistance please call on me.

Sincerely,

Robert A. Capra

Robert A. Capra, Project Manager
Light Water Reactors Branch No. 3
