

Mrs. George S. May
381 E. Poline Winnetka, Ill. 60093

It has been said to say that
regulatory system should
protect health & welfare of
citizens.

No safe method of storing
nuclear waste has been
presently devised.

This waste is extremely toxic
and dangerous to public health

In continuing the production
of nuclear waste and thus the
resultant production of waste
low is the public health & welfare
being protected when we go on
producing power & thus "toxic
waste" like we have safe methods
of storage.
