REGULATORY LOCKET FILE COPY

JUN 26 1979

MEMORANDUM FOR: D. G. Eisenhut, Acting Director
Division of Operating Reactors

FROM: V. S. Noonan, Chief, Engineering Branch
Division of Operating Reactors

THRU: L. C. Shao, Acting Assistant Director
for Engineering Programs
Division of Operating Reactors

SUBJECT: CRACKS IN DECAY HEAT PIPING - THREE MILE ISLAND - 1

I&E issued a Preliminary Notification regarding this matter on June 22, 1979. I have since contacted Ed Jordan of I&E and were given the following additional preliminary information:

In addition to the original leak, 11 NDT indications plus 4 areas of potential boric acid leaks have been found. The line is approximately 100 ft. long.

Joe Collins of I&E plus Al Taboada of EB are scheduled to visit the site on Thursday or Friday, June 28 or 29 to obtain further information.

A transfer of lead will be discussed with I&E after the site visit.
