Dr. Robert D. Moseley, Jr.
Department of Radiology
University of New Mexico
Albuquerque, New Mexico

REGULATORY DOCKET FILE COPY

Dear Dr. Moseley:

This is to confirm that you will be briefed on the Three Mile Island Accident by the NRC staff. Joe Deale of DOE also will attend to provide information on the DOE and interagency roles. The briefing is scheduled for 9:00 A.M., June 8, 1979 in Room 319 East-West Towers, 4350 East-West Highway, Bethesda, Maryland. Since I will be in Vienna June 3 for an IAEA meeting, I will not be at the briefing. Your contact will be Bernard Weiss, of our Inspection and Enforcement Office, who may be reached on 301-492-7246. The briefing should take about 2-3 hours. The E-W Towers are located about 2 1/2 miles south of the NIH-Navy Med Center area about 1/3 mile east of Wisconsin Avenue.

I will bring some key reports on TMI with me to the UNSCEAR meeting in anticipation that there could be considerable interest in the matter. I am also familiar with the interagency dose assessment report. Have a good trip.

Sincerely,

Robert E. Baker
Radiological Health Standards Branch
Office of Standards Development
