DOCKET NUMBER

PETITION RULE PRM-35-1 (44 FR 26817)

Att: Docketing and Service Branch

Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sirs:

I am responding to the petition filed by George V. Taplin, M.D. (Docket Number PRM-35-1) published in the Federal Register, Vol. 44, No. 89 on Monday, May 7, 1979.

I am very much in accordance with Dr. Taplin's petition and give it my full support. I feel strongly that the NRC should rescind the requirement that physicians must use an approved radiopharmaceutical strictly in accordance with the manufacturer's package insert.

Sincerely,

Wil B. Nelp, M.D.
Professor of Medicine and Radiology
Head, Division of Nuclear Medicine

WBN:lmt
c.c. George V. Taplin, M.D.
